

# 2D Drawing Summary - Seat Side Impact Reinforcement

| Drawing No.    | Revision | Material | Nominal Thickness | General Tolerance   |
|----------------|----------|----------|-------------------|---------------------|
| NB-SI-3411-DRW | B        | SPFC980Y | 1.80 mm           | +/-0.03 mm critical |

## Key Dimensions

| Feature             | Nominal  | Tolerance     | Critical Characteristic |
|---------------------|----------|---------------|-------------------------|
| Critical hole pitch | 112.0 mm | +/-0.03 mm    | Yes                     |
| Hole diameter       | 8.0 mm   | +0.03 / -0.00 | Yes                     |
| Flatness            | 0.15 mm  | max           | Yes                     |
| Side wall angle     | 88 deg   | +/-0.5 deg    | No                      |

## Manufacturing Notes

- 100 percent camera inspection on visible face.
- Gauge approval required before PPAP.
- No edge cracking allowed under 10x magnification.
